The Respirex Koolvest™ is an innovative product conceived specifically to provide comfortable cooling to an individual in circumstances of increased temperature

- Manufactured in Proban® flame retardant material with 100% cotton shell
- Absorbs heat generated by the wearer and maintains a comfortable cooling level of 65°F/18°C
- Can be worn directly against the skin
- One size fits all vest which is pulled tight to the body with adjustable straps.
- Machine washable
- Four internal pockets with Velcro tabs to contain the pre-charged KoolPacks.
- KoolPacks contain a safe, non-toxic, non-flammable semi-solid thermal energy storage material
- KoolPacks are simple to recharge in a fridge, portable cooler or even iced water
- Vest supplied complete with 4 KoolPacks.
- Single KoolPacks also available
